PATENT   Atty Docket No.: 10015452-1
                                               App. Ser. No.: 10/073,850

<u>IN THE SPECIFICATION</u>:

Please replace paragraph [0190] with the following paragraph:

[0190]   In operation, the analyzer 110 retrieves data from the repository 105 and

generates one or more hyperbolic trees. The display 119 shows one or more hyperbolic trees

to the user, including a plurality of nodes and links between nodes. The links are made

possible by unique identifiers created and assigned by the analyzer 110 to each tree/node.

Nodes and links inside a tree need to be encoded in a format defined by the software viewer

that displays the hyperbolic trees in the display 119, for example, the one from Inxight (see

http://www.inxight.com) of Sunnyvale, CA. Such encoding is performed in the analyzer 110

puts this information into a display to be presented to the user.
